

Your jobs, online

The CF Building Approvals client portal — what it is and how to get in.

Every job you have with us, in one place. Track where each one is up to, send us what we've asked for, and download your certificate and stamped plans the moment they're issued.

Lodging complete is the single biggest thing that speeds a job up. Our guidance notes set out exactly what we need for each type of work — they're all in the portal under **Info sheets**, and the one to read first is the lodging checklist.

WHAT YOU CAN DO

- ✓ **See every job** — one login for your whole company, a plain-English status on each job, and a search box when you have dozens.
- ✓ **Lodge a new job** — address, description, drawings and engineering, straight onto our board the moment you press lodge.
- ✓ **Send us information** — when we need something further, reply and attach it to the job itself.
- ✓ **Download issued jobs** — certificate and all stamped documents as a single file, plus a spreadsheet export of your job list.
- ✓ **Request an amendment** — on any job we've done for you, whether it's with us now or we finished it years ago.
- ✓ **Save the documents you reuse** — insurances, licences, standard details. Attach them to a job without going and finding the file.
- ✓ **Answer your own questions** — wind classification, soakwell sizing, bushfire, council forms and a site plan tool, all under **Resources**. Over the page.

WHY IT'S WORTH USING

- ✓ **No more chasing.** The status is on screen, updated every few minutes as the job moves.
- ✓ **Nothing gets lost.** What you send lands on the job, not in an inbox.
- ✓ **Faster turnaround.** Requests for further information reach you straight away and go back the same way.
- ✓ **You'll still get emails.** The portal doesn't replace them — an update on a job still reaches your inbox, with a link straight to it. And the moment a certificate is issued, we email you that it's ready.
- ✓ **Fewer things to send back.** The tools over the page answer, before you lodge, most of what we'd otherwise have to ask you for afterwards.

GETTING IN FOR THE FIRST TIME

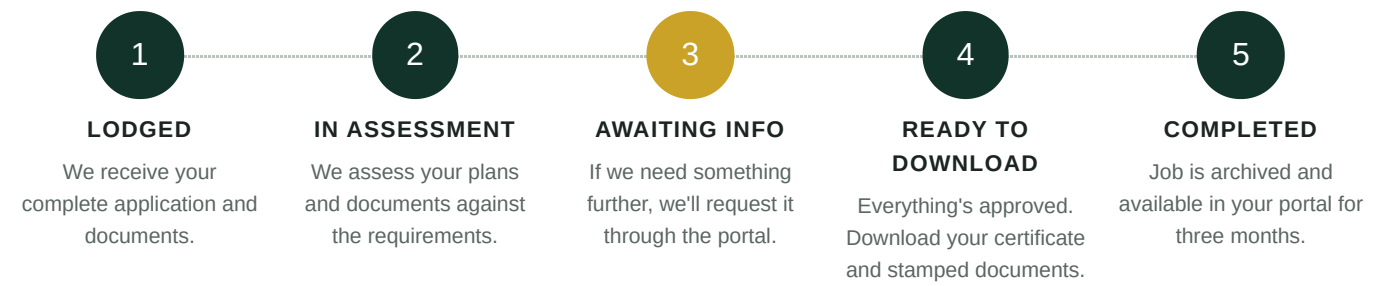

- 1 **We'll send you a username and a setup code**
One login per company — everyone on your team uses the same one and sees the same jobs. Prefer a login each, with your names on messages? Just ask.
- 2 **Open the portal and choose *First time***
Enter the username and the setup code, then pick your own password. We never see it.
- 3 **That's it**
After that it's just your username and password. Setup codes expire, so use yours when it arrives — if it lapses, use *Forgot password?* or ask us for another.

HOW LONG JOBS TAKE

Most jobs are certified within about **three to four business days** of everything being received — the clock starts when the last document arrives, not when the job is first lodged. We don't put a date on an individual job: a certificate that has to be corrected, or that comes back from the permit authority, costs weeks, so getting it right first time is the fastest way to get you built. If a job is genuinely time-critical, tell us when you lodge it rather than after.

THE FIVE STAGES EVERY JOB MOVES THROUGH

JOB STATUS AT A GLANCE

Ready to Download	Approved and ready. Download your certificate and plans.
Awaiting Information	We need something further. Check the job and upload your documents.
In Assessment	Our team is reviewing your application.
Lodged	We've received your application and it's in the queue.
Completed	Certificate issued and all documents available.

CHANGING SOMETHING AFTER WE'VE STARTED

Use **Amend a Job**. Pick the job — your current ones are listed, and so are the ones we finished years ago — say what's changed and attach the new drawings. It goes straight to whoever certified the original rather than into the queue behind new work, which is why an amendment usually comes back faster than a fresh job. Your existing certificate stays valid until the revised one is issued, and both sit side by side in **Downloads**.

TOOLS WE'VE BUILT YOU

All under **Resources**, all free, and none of them need us. They exist because they answer the questions we're asked most, and because most of what sends a job back is something that could have been settled before you lodged.

Wind classification	Region, terrain, shielding and topography in — your AS 4055 wind class out, with the working shown. Not sure of your topographic class? It works that out too.
Soakwell calculator	How much soakwell a new roof needs, and which standard sizes make it up. Adding to a lot that already has them? It sizes the whole roof, not just the new part — which is how people find out the house was never covered either.
Site plan tool	Draws a compliant A4 site plan at a real scale from your actual lot boundary: north point, scale bar, dimensions to every boundary, title block. For a simple job it saves us sending it back for one.
Bushfire map check	Your address straight into Landgate's bushfire-prone map. Answers "do I need a BAL assessment?" before you lodge instead of after. If you do, we can prepare it.
Council forms	BA1, BA2, BA5, BA7, BA9, BA13, BA19 and BA22 — Word or PDF, kept current, with a link to the official source beside each.
Your local government	Every council we deal with, each linked to its building application page rather than its home page.
The guidance notes	Fourteen of them, under Info Sheets — site plans, engineering, BAL, retaining, elevations, boundaries, pool barriers, stormwater, easements and more. The lodging checklist is the one to read first.

The three calls we get most — *what wind class am I?*, *do I need a BAL?*, and *my site plan came back* — are all answered on that one page in under a minute. Ring us anyway if you'd rather; we'd just rather you weren't waiting on us for something you can settle in twenty seconds.

FORGOT YOUR PASSWORD?

Use **Forgot password?** on the sign-in screen and a new setup code is emailed to the address we hold for your company. Your current password keeps working until you use the code.

We never see your password and can't tell you what it is.

FREQUENTLY ASKED

Is it secure?

Your jobs are visible only to your logins, and that's checked on every page and every download. No file has a public link. Passwords are stored scrambled and one-way — nobody can read them back, including us.

Can more than one person use it?

Yes — share the company login, or ask us for a named login per person.

Phone or tablet?

Yes. The portal works on any device.

Ready to get started?

Scan the code or ask us for the link, and log in to the CF Building Approvals client portal today.
