

Your certificate is ready

Hi [CONTACT NAME],

Good news — the certificate for [SITE ADDRESS] (job [JOB REF]) has been issued.

It's waiting in our **client portal**, and we've set you up a login so you can grab it now — along with the live status of every other job you have with us.

Portal	cfba-client-portal-theta.vercel.app
Username	[USERNAME]
Setup code	[SETUP CODE]

To download it — about five minutes, once ever:

1. Open the portal and choose **First time here**
2. Enter your username and the one-time setup code above
3. Choose your own password — we never see it
4. Open **Downloads** — your certificate package is one click

From here on, every job lives there: lodge new ones straight onto our board, answer our requests with the documents attached to the job, and download each certificate the moment it's issued.

Rather do this one by email as usual? No problem — reply and we'll send it through. And if you'd like a hand with the portal, ring **1300 029 074** and we'll walk through it with you.

Regards,

The CF Building Approvals team
