

# We've asked for something — here's the fast way back

How to answer an information request so your job keeps moving.

Sometimes an assessment can't continue until we have something further — a missing engineering detail, a dimension, a signed document. When that happens the job pauses, and the fastest way to restart it is through the portal.

## WHAT HAPPENS, STEP BY STEP

## WHY REPLY IN THE PORTAL RATHER THAN BY EMAIL?

- ✓ **It can't get lost.** Your documents attach to the job itself, not to an inbox that's on leave.
- ✓ **It's faster.** The surveyor sees it the moment it arrives, already filed against the right job.
- ✓ **Everyone can see it's done.** The job shows *Answer sent* — *it's with us*, so your whole team knows it's back in our court.

**The clock restarts when the last document arrives.** Most jobs are certified within 3–4 business days of everything being received — so the sooner the request is answered, the sooner your certificate is issued. If anything in a request is unclear, reply in the portal and ask; that reaches us the same way.

### Open your jobs

Scan the code, or use the link in any email we've sent you — it goes straight to the job it's about.
